

Why *NC Go!* matters

NC Go! is North Carolina's only broad-based organization working exclusively to improve mobility around the state. That means advocating for more funding for roads, bridges, public transportation, airports, ferries and other transportation options.

***NC Go!* is making a difference**

Since 2007, transportation funding advocates have made great strides – and *NC Go!* has been leading the pack in communicating with legislators and the media. A look back at our goals from 2007 compared to today shows the accomplishments of *NC Go!*

- ✓ **Preserve the Gas Tax:** In late 2011, *NC Go!* advocates sent more than 3,100 messages urging state legislators to protect our state's largest source of transportation funding.
- ✓ **Stop the Transfer:** Phase-out of the annual transfer from the Highway Trust Fund to the General Fund was passed in 2008.
- ✓ **Allow Tolling:** Our state's first toll project opened at the end of 2011 in the Triangle and others are being developed throughout the state. Part of the Highway Trust Fund transfer phase-out was utilized for toll projects starting in 2008.
- ✓ **Authorize Local Option Funding:** In 2009, legislators authorized counties to hold referenda on local-option sales tax for public transportation and congestion relief projects.

***NC Go!* moving forward**

Your help is needed. 2012 goals for *NC Go!* and transportation advocates include:

- Provide a plan to state leaders on fundamental reform for how our state finances transportation projects.
- Re-authorization of federal surface transportation programs (SAFETEA-LU)

What is *NC Go!* worth to your organization?

\$5 a day? \$10 a day? Better yet, what is the cost of inaction? What is the price for job creation and improved mobility?

***NC Go!* needs your support. Please consider renewing to allow us to continue fighting for adequate investment in our state's transportation system.**
